

Science-in-the Park After School Workshops

February 6 - May 12, 2017

Idlewild Park Preserve Environmental Science Learning Center
149-20 Springfield Lane, Springfield Gardens, NY 11413

Nature's Balancing Act

Staying Alive in Nature

Sponsored by the Eastern Queens Alliance,

Through small-group, age-appropriate, hands-on environmental science workshops, students will learn how different species interact with each other and their environment. They will learn how the existence of one species affects the growth and survival of other species; of what it takes to survive and thrive in nature. They will learn about the diversity and adaptations used by different species to stay alive. They will explore how the existence of some species may help others. They will learn about such topics as *endangered species*, *climate change*, and *diversity*. Throughout the program, we will use Idlewild Park Preserve as a natural laboratory.

Dates of Workshops: February 6 - May 12, 2017

Time: 3:30 - 5:00 PM

Location:

Environmental Science Learning Center Trailer
149-20 Springfield Lane,
Springfield Gardens, NY 11413
