

Spring Break Science-in-the-Park

Set your Sights on college

With this workshop series your child will spend a couple of hours doing science experiments and other activities that introduce them to science majors in colleges and careers in science. This workshop series consists of introducing high school students to the college application process, science majors, and exciting careers they can have with science degrees. Additionally, with this series your child will do actual science experiments that relate to the work done in science based careers.

This program is designed to spark and encourage your child's interest in science. This half day program allows for your child to spend a few hours of the day participating in hands on science activities that while fun will help open a world of possibilities in the sciences.

FREE!!!

April 26th 2016

10:00 am- 10:45am: Set Your Sights on College Grades 8-11

Introductory workshop to science majors and careers
