

Spring Break Science-in-the-Park Wetland Function

The EQA is located in Idlewild Park. Idlewild Park is a wetland preserve. This wetland provides the largest volume of fresh water to Jamaica Bay. With these workshops children will get to study how wetlands work, learn of the importance and need of wetlands, and get to model and simulate a wetland.

This program is designed to spark and encourage your child's interest in science. This half day program allows for your child to spend a few hours of the day participating in hands on science activities that while fun will help open a world of possibilities in the sciences.

FREE!!!

Registration Required

April 28th 2016

10:00 am- 11:45am: Wetland in a Pan Grades 5-9

Simulate the functions of a wetland with this easy and fun activity
